

	Agency Mitigation Measures		
Area	State/Local	Other Federal	GSA
Utilities (Scenarios A, B, C and D)	Conduct detailed sewer study to determine if the capacity of sanitary sewer interceptors is adequate to accommodate wastewater from development at VAAP. If upgrades are required, develop plans to phase upgrades in accordance with site development and build out plans. Implement zoning that encourages pollution prevention and recycling.	None Recommended	None Recommended
(Scenarios B and C)	Consider curbside pick-up of recycling in residential areas.	None Recommended	None Recommended
Air Quality (Scenarios A, B, C and D)	Implement fugitive dust emission control requirements for site development activities.	None Recommended	None Recommended
(Scenarios A and C)	Implement the use of dust suppressants and low speed limits (posted) to minimize dust emissions resulting from Landfill dump trucks. Consider use of a vehicle wash rack at the landfill to minimize the tracking of mud and dirt onto access roads. Enforce proper execution of landfill operations to ensure odor emissions from landfill will be reduced. Consider flaring of vented landfill gas.	None Recommended	None Recommended
Noise (Scenarios A, B, C and D)	Enforce City noise ordinance to limit construction noise.	None Recommended	None Recommended
(Scenarios A and C)	Site firing range to limit impact to adjacent residences.	None Recommended	None Recommended
